To Whom It May Concern:

Attached please find comments from the American Public Power Association<sup>1</sup>, the Edison Electric Institute<sup>2</sup>, the Electric Power Supply Association<sup>3</sup>, the Exelon Corporation<sup>4</sup>, and the National Rural Electric Cooperative Association<sup>5</sup> on the Draft National Cyber Incident Response Plan, dated September 30, 2016. As representatives of the electric industry, we appreciate the opportunity to provide input to this plan.

Sincerely,

American Public Power Association  
Edison Electric Institute  
Electric Power Supply Association  
Exelon Corporation  
National Rural Electric Cooperative Association

---

<sup>1</sup> The American Public Power Association is the national service organization representing the interests of not-for-profit, publicly owned electric utilities throughout the United States. More than 2,000 public power systems provide over 14% of all kilowatt-hour sales to ultimate customers and serve over 48 million people, doing business in every state except Hawaii.

<sup>2</sup> The Edison Electric Institute is the association that represents all U.S. investor-owned electric companies. Our members provide electricity for 220 million Americans, operate in all 50 states and the District of Columbia, and directly and indirectly employ more than one million workers.

<sup>3</sup> The Electric Power Supply Association is the national trade association representing leading competitive power suppliers, including generators and marketers. Competitive suppliers, which collectively account for 40% of the installed generating capacity in the United States, provide reliable and competitively priced electricity from environmentally responsible facilities serving power markets. EPSA seeks to bring the benefits of competition to all power customers. These comments represent the position of EPSA as an organization, but not necessarily the views of any particular member with respect to any issue.

<sup>4</sup> Exelon Corporation is a FORTUNE 100 company that works in every stage of the energy business: power generation, competitive energy sales, transmission and delivery. As the nation's leading competitive energy provider, Exelon does business in 48 states, D.C., and Canada and had 2015 revenues of \$34.5 billion. We employ approximately 34,000 people nationwide.

<sup>5</sup> The National Rural Electric Cooperative Association is the national service organization that represents the nation's more than 900 private, not-for-profit, consumer-owned electric cooperatives, which provide service to 42 million people in 47 states.
